

Gastroenterology Research Group

New Member Application

I. Personal Information

First Name _____ MI _____ Last Name _____

Degree(s) MD PhD Other _____

Office Address _____

City _____ State _____ Country _____ Zip _____

Home Address _____

City _____ State _____ Country _____ Zip _____

Phone Number _____ Fax Number _____

E-mail Address _____ Date of Birth _____ (M/D/Year)

II. Research and Publications

Brief description of research _____

Titles, authors, and journal references of one published article in a referenced journal of which you are an author _____

III. Categories of Membership

ACTIVE: \$60⁰⁰ Annual Dues. All investigators in clinical and basic sciences related to gastroenterology and hepatology.

TRAINEE: \$25⁰⁰ Annual Dues. Any resident, fellow or trainee who has completed at least 2 years of postdoctoral training and is continuing in a trainee position in either gastroenterology or hepatology.

IV. Trainee Certification

I, _____ Certify that Dr. _____

is a resident/trainee at _____.

Date training will be completed (month and year) _____

Signature of Training Director _____

Please check one Resident Trainee Assistant

Return completed form with check made payable to the Gastroenterology Research Group to:

Gastroenterology Research Group
4930 Del Ray Ave, Bethesda, MD 20814
Email questions to grg@gastro.org

Please circle no more than 3 descriptors that best describe your research interest(s).

GI Descriptors

Clinical Practice

- 01 Clinical Management Strategies
- 02 Epidemiology
- 03 Health Policy and Technology Assessment
- 04 Practice Management and Quality Assurance

Esophageal, Gastric, and Duodenal Disorders

- 05 Secretion: Mechanisms and Regulation
- 06 Muscosal Growth and Differentiation; Mucosal Blood Flow
- 07 Muscosal Damage and Repair; Experimental Mucosal Lesions
- 08 Helicobacter pylori
- 09 Acid Peptic Disease: Epidemiology, Pathogenesis, Diagnosis, and Treatment
- 10 Upper GI Bleeding; NSAID-Related Lesions
- 11 Reflux Esophagitis
- 12 Clinical Esophageal Disorders (Non-Reflux)

Intestinal Disorders

- 13 Pathophysiology of Diarrheal Disorders
- 14 Malabsorption/Gas
- 15 Epithelial Nutrient/Salt/Water Transport
- 16 Regulation of Transport
- 17 Enterocyte Cell & Molecular Biology
- 18 Splanchnic Circulation- All Organs
- 19 Intestinal Bleeding

Pancreatic Disorders

- 20 Protein Synthesis/Transport
- 21 Hormone Receptors/Action

- 22 Enzyme/Ions/Water Secretion
- 23 Neurohormonal Control
- 24 Acute Pancreatitis
- 25 Chronic Pancreatitis
- 26 Exocrine/Endocrine Tumors

Biliary Disorders

- 27 Biliary Stone Disease: Non-Surgical Therapy
- 28 Biliary Stone Disease: Surgical and Endoscopic
- 29 Gallstones: Chemical, Physical, Mechanical, Radiological Properties
- 30 Biliary Tract Imaging; Biliary Tract Endoscopy
- 31 Biliary Disease: Other
- 32 Biliary Tract Motility Sphincter of Oddi

Gastrointestinal Oncology

- 33 Cell and Molecular Biology/Immunology
- 34 Proliferation/Carcinogenesis
- 35 Screening/Diagnosis/Prognosis
- 36 Treatment/Experimental Therapeutics/Prevention
- 37 General Clinical/Epidemiology

Motility and Nerve-Gut Interactions

- 38 Receptors/Channels/Intracellular Signals/Contractions/Relaxation
- 39 Intrinsic & Extrinsic Control: Nervous, Chemical
- 40 Physiology/Pathophysiology/Pharmacology/Esophagus and Stomach
- 41 Physiology/Pathophysiology/Pharmacology/Small Bowel
- 42 Physiology/Pathophysiology/Pharmacology/Distal Gut

- 43 Functional/Behavioral; Epidemiology; Treatment

Growth, Development, and Nutrition

- 44 Mucosal Growth Factors
- 45 Development of Gastrointestinal Function
- 46 Disorders of Gut Development
- 47 Intestinal Absorption of Nutrients
- 48 Nutrients/Gut Function
- 49 Clinical Nutrition
- 50 Aging

Immunology, Microbiology, and Inflammatory Disorders

- 51 Mucosal Immunity
- 52 Host Defense Mechanisms
- 53 Inflammation
- 54 Inflammatory Bowel Disease Basic
- 55 Inflammatory Bowel Disease Therapy
- 56 Inflammatory Bowel Disease – Clinical Investigation and Epidemiology
- 57 Gastrointestinal and Hepatic Infections/Viruses
- 58 AIDS (Basic and Clinical)
- 59 Helicobacter pylori (Basic)
- 60 Microbial and Immune Medicated Injury/Pathology

Hormones and Receptors

- 61 Physiology/Cell Biology
- 62 Molecular Biology
- 63 Biochemistry
- 64 Miscellaneous
- 65 Neurotransmitters
- 66 Growth Factors
- 67 Brain-Gut Axis

Liver Descriptors

- 68 Morphology, Cancer, Regeneration
- 69 Molecular and Cell Biology, Collagen, Fibrosis
- 70 Chronic Hepatitis (Nonviral), Primary Biliary Cirrhosis, Sclerosing, Cholangitis, Immunology
- 71 Hepatitis
- 72 Ethanol, Nutrition, Metabolism (Including Genetic Disease)
- 73 Complications of Cirrhosis: Portal Hypertension, Portal Circulation
- 74 Complications of Cirrhosis: Ascites, Encephalopathy

- 75 Hepatic and Biliary Bile Acid and Ion Transport: Bile Formation and Cholestasis
- 76 Bile Acids, Bile Acid Synthesis and Metabolism, Bile Lipids and Protein: Lipoproteins
- 77 Gallstones, Formation and Treatment; Pathobiology of Gallbladder and Biliary Tree
- 78 Cell Injury, Hepatotoxicity and Pharmacology
- 79 Transplantation and Hepatobiliary Surgery
